FOR IMMEDIATE RELEASE

Compunetix Introduces EVERGREEN™ Family of MCUs

Monroeville, Pa., June 1, 2010 – Compunetix, Inc., announced to the market a new line of Multipoint Control Units (MCUs) known as the EVERGREEN™ family. Initially, this family will be based on three platforms, the Cedar™, the Cypress™, and the Sequoia™ and will address the needs of the diverse videoconferencing industry, from enterprise users to Conferencing Services Providers (CSPs) and government agencies. Compunetix will be showcasing the EVERGREEN family at the InfoComm 2010 tradeshow in Las Vegas next week.

The EVERGREEN family of MCUs marks the reemergence of Compunetix into the videoconferencing collaboration market. "The EVERGREEN family of MCUs embodies the engineering and marketing knowledge base of our entire organization. This product family leverages the video experience of our Video Systems Division (VSD) and adds to it the broad knowledge of commercial collaboration platforms of our Communications Systems Division (CSD), along with the reliability, redundancy and security features built into the products of our Federal Systems Division (FSD)" said Jim Klueber, Division Manager of VSD.

The EVERGREEN family has been architected in anticipation of an explosion of video enabled products from hand-held wireless devices, to desktop systems, room video systems, all the way to executive telepresence suites. EVERGREEN achieves this through advanced digital signal processing technology, a richly interconnected, high bandwidth internal switch fabric and a unique set of link ports which allow multiple MCUs to be interconnected without cascading. Built on a multiply redundant platform, EVERGREEN offers a carrier class product at an extremely attractive price.

Dr. Giorgio Coraluppi, Compunetix President and CEO, commented "Compunetix is very proud to introduce the EVERGREEN family of MCUs to the market. Videoconferencing is becoming pervasive in business and in the consumer market. With EVERGREEN, we are poised to support the infrastructure required to meet today's and tomorrow's demand."

About Compunetix, Inc.

Compunetix is recognized as a leading manufacturer of multipoint collaboration equipment and is best known for its audio conferencing equipment and Web collaboration software. With over 500,000 ports installed in more than 28 countries, the company has the industry's largest worldwide deployment of digital conferencing systems. Dedicated to customer-focused and innovative technology, Compunetix engineers and manufactures all aspects of its conferencing equipment, ensuring its customers that their media processors are the highest quality, most reliable and most flexible solutions on the market.
