Compunetix and EMAG Group Establish Video Distribution Agreement

EMAG to Promote EVERGREEN™ Video Collaboration Across Russia

Monroeville, Pa., September 28, 2011 – The Compunetix, Inc. Video Systems Division (VSD), a global leader in carrier-grade, VoIP and high definition video collaboration solutions, and EMAG Group, a collaboration specialist in Moscow, Russia, have entered into a distribution agreement for the VSD EVERGREEN™ family of media processor solutions. The EVERGREEN systems connect video conference terminals/endpoints, desktop video clients, and mobile devices together for on-demand and scheduled video conference meetings, allowing participants from down the hall or across the globe to communicate face-to-face.

"We were very impressed by the EVERGREEN MCU from first sight. It is a universal system developed to work with different endpoints from any vendor. The first-class reliability and wide range of configurations makes this system one of the best in the market. Many features are totally unique, like fiber connectivity between several MCUs to create one large system," states Mr. Lev Komissaruk, Technical Director of EMAG Group.

"Our partnership with EMAG Group opens a new territory for us and introduces Compunetix video products to the Russian and Commonwealth of Independent States markets," says Mr. James Klueber, Division Manager of the Compunetix Video Systems Division. "Strategic partnerships such as this continue to push us to excel and innovate to help change the collaborative landscape across the globe."

About Compunetix, Inc.

Compunetix is the global leader in carrier-grade multimodal conferencing and collaboration solutions including VoIP and HD video, all powered by superior hardware design. With nearly one million ports installed in more than 28 countries, the company has the industry's largest worldwide deployment of digital conferencing systems. Dedicated to customer-focused and innovative technology, Compunetix engineers and manufactures all aspects of its conferencing equipment, ensuring its customers that their media processors are the highest quality, most reliable and most flexible solutions on the market.
