## **FOR IMMEDIATE RELEASE**

### **CONTEX Summit Collaboration Platform JITC Certified**

Monroeville, Pa., September 13, 2012 – Compunetix, Inc., the leading manufacturer of collaborative conferencing platforms, is proud to announce that the CONTEX Summit® has successfully met all Interoperability and Information Assurance requirements for full Accreditation and listing on the Defense Information Systems Agency (DISA) Unified Capabilities Approved Products List (APL) for use with Defense Switched Network (DSN) – the communications network used by the Department of Defense and other governmental departments and agencies. All testing was completed at the Joint Interoperability Test Command (JITC) at Fort Huachuca, Arizona and certifies that the Summit can deploy into a TDM and/or AS-SIP (via a LSC gateway) environments within the DoD/DISA infrastructure. The Summit is certified with the T1 ISDN PRI American National Standards Institute (ANSI) T1.619a interface to Local Session Controllers (LSCs) listed on the UC APL. JITC is the Defense Information System Agency's (DISA) primary agent for testing, evaluating, and certifying Information Technology (IT) and National Security Systems (NSS) used in joined and combined operations.

The JITC Certified CONTEX Summit is full-featured and includes multi-level precedence and preemption (MLPP), blast dial into conference, and multiple dial attempts, allowing communications to flow smoothly and securely in mission-critical environments. Reliability, scalability, and unmatched voice quality place the JITC Summit solution in the forefront of cloud capable government voice solutions.

"Compunetix was established with mission-critical government environments in mind," notes Mr. John Krofcheck, Director of Government Sales at Compunetix. "The CONTEX Summit continues along this path of proud history by serving as an approved and critical piece of the unified capabilities infrastructure."

#### **The CONTEX Summit**

The CONTEX Summit is the cornerstone media processor in the multipoint collaboration industry, combining the quality, reliability, and feature richness of traditional solutions with the flexibility and cost effectiveness of IP-centric, next-generation communication. Featuring unmatched scalability, open-system APIs for development, and a full roster of complementary software and control applications, the Summit supports all call types, endpoints, and markets for a full-featured solution.
