

Through Hole Assembly Equipment

In addition to our trained through-hole assembly technicians, we also use automated and semi-automated equipment for this type of assembly work. For mass-soldering applications, we rely on selective and wave soldering systems, both leaded and lead-free.

Amistar 3000

- Automated DIP inserter

Amistar 6448

- Automated axial lead inserter
- Military specification component forming
- 100% component verification

Contact Systems CS-400B

- Semi-automatic component locator/inserter

Format III Lead Former

- Automatic axial component lead forming

Soltec Delta Wave

- Spray fluxer
- Dual Wave
- Select X debridging system

Electrovert Century 2000

- 20" wave solder machine
- Closed loop infrared preheat
- Omega wave
- Automatic process recall

Westec Formula IIRS

- Aqueous/Semi Aqueous Cleaning
- De-ionized water rinse
- CFC free
