### **Compunetix Launches Communication System for the US Navy**

For the past four years, Compunetix's Federal Systems Division (FSD) has partnered with the U.S. Navy to develop, implement, and deploy the Secure Voice Communication System (SVCS) for naval military applications. The SVCS establishes a critical voice communication architecture that is both user-friendly and easily upgradeable, ensuring efficient updates to equipment, software, and firmware. This system connects consoles, remote terminals, ship phone systems, ship communications networks, and external radio devices. Designed as an enterprise-level solution, the SVCS can be used across various ship platforms.

### **Compunetix CEO and Senior Vice President Featured on TechVibe Radio**

Compunetix CEO Mike Hockenberry and Senior Vice President Jerry Pompa were recently invited for an interview on Pittsburgh's TechVibe Radio. Hosts Audrey Russo and Jonathan Kersting lauded the company for continuing to hold its standing at the forefront of Pittsburgh's technology scene. Compunetics, Compunetix, and Chorus Call, with their diverse portfolios spanning printed circuit board manufacturing, electronic assembly, and cutting-edge communication solutions, are making a significant impact on industries ranging from defense to collaboration. Mike and Jerry explained the organization's structure, which encompasses several key areas.

## 40th Space Symposium

Compunetix's Federal Systems Division recently showcased its latest products during the [40th Space Symposium](#), in Colorado Springs, Colorado. This prestigious annual event gathers leaders in space technology from around the world to discuss the next frontier of space exploration and build partnerships that will secure our future. The Space Symposium is the premier global event for space professionals, offering a unique platform to address critical issues, foster dialogue, and drive innovation across the industry. With hundreds of exhibitors and speakers confirmed, the event draws thousands of attendees.

The Compunetix focus was on expanding our presence in global private launch and shuttle agencies, as well as supporting DoD and Space Force applications. Compunetix displayed our latest MC Series

of Voice Consoles, designed to enhance the capabilities of widely deployed MVP systems for mission-critical communications. They also demonstrated the MVP [Mission Voice Communication system](#) and displayed advanced communication products, including GTX software-based Voice Consoles, 4-STAR IP Gateway, KyolP Device, and the new VIPER-based STE-R replacement accessory.
