ConferenceManager 5v Achieves JITC Certification and Joins the DISA Approved Product List

We're excited to share a major milestone for Compunetix and our customers in the defense community: [ConferenceManager5v](#) has officially passed all [JITC](#) testing at Ft. Huachuca and is now listed on the DISA Approved Product List (APL) for deployment on the Defense Switched Network (DSN)!

This certification highlights our unwavering commitment to delivering secure, reliable, and innovative collaboration tools tailored to the mission-critical needs of the Department of Defense.

The JITC approval is more than just a checkmark—it's a testament to the robustness, security, and operational readiness of ConferenceManager 5v. With this certification, organizations across the DoD

can confidently deploy ConferenceManager5v knowing it meets the strictest standards for interoperability and cybersecurity.

This latest version of ConferenceManager introduces exciting new capabilities designed to enhance your mission-critical communications, including:

- **Integrated Video Collaboration**Expand beyond voice and data with seamless support for WebRTC and SIP Room video connections.
- **Intuitive Touchpad Interface**An optional **touchpad interface** makes session initiation, management, and control more efficient than ever.
- **Real-time Translation & Transcription**Live voice-to-text transcription and multilingual translation help break communication barriers in real-time.
- **Enhanced Mobile Integration**Optional support for Land Mobile Radio (LMR) enables direct audio input from field communication systems.

Compunetix Leading the Way with Easy to Use Communications Solutions for the Elderly

Compunetix is addressing the growing need for accessible communication tools for older adults, many of whom face social isolation and struggle with modern technology. With life expectancy increasing and digital literacy remaining a challenge, seniors often encounter barriers to maintaining connections with family, caregivers, and healthcare providers.

The company's **ConnectNow+** platform offers a streamlined interface for video calls, messaging, and screen sharing across devices like smartphones, tablets, laptops, and kiosks. Features such as live speech-to-text, language translation, and customizable layouts make it easier for elderly users to engage without technical frustration. Complementing this, **Video Call Center (VCC)** provides HIPAA-compliant video routing for assisted-living, home care, and telehealth settings, with QR-code or link-based call access, operator assistance, geolocation for emergencies, and integrated intake forms.

By focusing on simplicity, security, and adaptability, Compunetix bridges the gap between seniors and essential digital communication. Its solutions enhance social interaction, support healthcare delivery, and create a safer, more connected experience for the aging population.

Compunetix Set to Participate in IAUG Converge 2025

Compunetix is excited to announce our participation in [IAUG Converge 2025](#), taking place September 22–24 in Kansas City, Missouri. This premier event brings together Avaya users and communication technology professionals for three days of innovation, networking, and hands-on learning. We'll be highlighting our [Unified Collaboration](#) solutions—including [ConnectNow™](#) and [Video Call Center™](#)—which deliver secure, scalable, and customizable conferencing for enterprise, government, and service provider environments.

Our team will also be contributing to breakout sessions focused on unified communications, AI in contact centers, and secure collaboration strategies. IAUG Converge offers a valuable opportunity to engage with industry peers, explore emerging technologies, and share how Compunetix is helping organizations enhance their communication infrastructure in mission-critical environments.

Federal Systems Division of Compunetix Prepares for Upcoming Events

In 2025, Compunetix will exhibit at three major industry events to showcase its mission-critical communications and telemetry solutions.

- [AUVSI Pathfinder Symposium](#) (Aug 25–27, Huntsville, AL) – Compunetix will highlight its role as the DoD's leading provider of mission communications for UAV Command and Control Ground Stations, connecting with UAS and counter-UAS experts from government, academia, and industry.
- [GovTech/AFCEA Space Technology Expo](#) (Sept 24, Patrick Space Force Base, FL) – The company will display its MC voice consoles and meet with U.S. Air Force, Space Force, and NASA personnel in an exclusive 35-vendor technology showcase.
- [International Telemetry Conference \(ITC\)](#) (Oct 20–23, Las Vegas, NV) – Compunetix will demonstrate its MVP system and MC voice consoles at the 60th annual ITC, a key event for global telemetry professionals and test range customers.

These events reinforce Compunetix's leadership in defense, space, and telemetry communications while strengthening its connections with military, aerospace, and technology partners.
