## E-NEWS

## Compunetix Releases Olympus HD Voice App

Compunetix proudly introduces its new high definition voice collaboration app - available now for free in the Apple® iTunes® App Store®. This unique tool facilitates clear, concise collaboration between participants with just a touch of a button, minimizing conferencing complexities and maximizing the auditory experience. This encrypted IP-based calling app delivers HD meeting audio in a seamless and powerful new user experience. The app's quick integration into your device environment allows it to work smoothly in the background to elevate the audio experience to Olympus-sized levels. It is ideal for mission critical environments and collaboration service providers alike. Those currently utilizing the **Summit Olympus UC platform** can contact their Account Managers for upgrade specifics.

High definition (HD), or wideband, audio allows for a significantly enhanced experience for the conferencing end user. Much like the difference between SD and HD video, high definition voice takes group communication to a completely new level. ***Click here to learn more about the Olympus HD Voice Collaboration App***.

## Compunetix Engineering Services: From Concept to Completion

Compunetix considers ourselves to be a high-mix, specialty contract manufacturer that offers a tailored method to meet any customer's most critical requirements. Our approach encompasses the entire spectrum of electronics manufacturing including design, fabrication, procurement, assembly and testing services.

We leverage these skills and technologies to produce highly-sophisticated electronics systems, from PCB level assembly and testing services to highly sophisticated electronic system integration.

One of the more interesting aspects of the Engineering Group at Compunetix is the vast range of problems we get to solve for our customers. As part of our in-house expertise developing hardware and software for telecommunication systems, we perform a broad variety of design services for our clients including analog and digital design, signal integrity analysis, and signal processing. ***Read more on our blog*** .

## Jerry Pompa Among Pitt's Department of Computer Science Featured Alumni

This year marks the 50th anniversary of the much heralded University of Pittsburgh Computer Science program and Compunetix would like to congratulate the entire Pitt organization on their outstanding growth, reputation and success.

The University has recently launched a special webpage commemorating this great achievement. The page provides links and information about the storied program's past and it's **featured alumni**.

One of those featured alumni is our own Compunetix Vice President and Division Manager, Mr. Gerard Pompa. Jerry gained his undergraduate B.S. degree in C.S and Mathematics from Pitt before acquiring his M.S. in Computer Science. ***Check out Jerry's bio here***.

## Compunetix Systems Certified RoHS Compliant

In its continuing dedication to quality in engineering and manufacturing, the Compunetix Federal Systems Division (FSD) and Video Systems Division (VSD) have been awarded several certifications related to RoHS (Restriction of Hazardous Substances Directive) and the CE mark for European market compliance. RoHS is also known as "Lead-Free" and originated in the European Union. It restricts the use of six hazardous materials found in electrical and electronic products, including lead, mercury, cadmium, and hexavalent chromium. Since 2006 all applicable products in the EU market must pass this compliance, which aids in the overall safety of the components along with increasing the ease of product re-use and recycling.

FSD's MVP System Family and VSD's EVERGREEN System Family have been certified. The MVP is a purpose-built machine for mission voice environments, designed to meet demanding requirements for reliability, maintainability, and security. The EVERGREEN line represents the widest array of video collaboration infrastructure options available for the cloud or on premise environments.

## Upcoming Trade Events
We're looking forward to attending an event near you!

Here are the upcoming events on our trade show calendar:

**HIMSS 17**
February 19 - 23, 2017
Orlando, FL

**NASTD Southern Region Seminar**
March 6 - 9, 2017
Charlotte, NC

**Enterprise Connect**
March 27 - 29, 2017
Orlando, FL

**Compunetix, Inc.**
2420 Mosside Blvd.
Monroeville, Pennsylvania 15146
412-373-8110
