

Happy Holidays from all of us at Compunetix

Compunetix wishes all of our customers, partners and employees Happy Holidays! During this season, we are thankful and appreciative of your continued business while we reflect upon the past 50 years of Compunetix and look forward to many more!

May this season bring you the gifts of peace, hope and joy!

Legal Collaboration Solutions by Compunetix

For the past decade, Sonexis, a Compunetix brand, has added value to the legal sector across the board. From law firms to courtrooms, [Compunetix legal solutions](#) continue to improve

communication and reduce costs for all types of court proceedings. From local to federal courts, Sonexis has helped pave the way for telephonic court appearances as the go-to alternative to ensure timely appearances and judicial decisions.

CourtConnect is one of the solutions offered which allows users to schedule and manage meetings and discussions for court proceedings of all kinds. This robust option is powered by the **ConferenceManager™2**, the popular and powerful multipoint real-time communications server.

Additionally, a recent partnership with **ATI-Connect** and their StreamWrite self-service/business process automation platform has enabled a new comprehensive solution for remote court appearances; **VCourt**. The VCourt solution combines the secure CM2 telephony and video technology with new, up-to-date workflows, providing seamless access to connect judges, attorneys and other parties for hearings, trials, mediation and arbitration. This unique solution features workflows for fine payment, case lookup, appointment reminders and live, real-time proceedings.

Representatives from Compunetix and Sonexis exhibited at the **2018 eCourts** show last week, December 10-12. The annual event was held in Las Vegas, NV and showcased our e-justice solutions.

Compunetix Keeps Current with the Latest Equipment

One look at our list of customers and projects demonstrates that keeping current with the latest equipment is an absolute must. With that in mind, the **manufacturing division** of Compunetix has recently acquired some new machinery. This includes a Soltec Delta X wave solder machine which represents a large upgrade over a former wave solder machine. The Soltec Delta X contains a spray fluxer which features six feet of preheat and 1,450 pounds of molten SAC305 (an alloy of Tin-silver-copper). This machine will be used for RoHS (lead free) soldering of circuit cards which is especially noteworthy for various European customers.

For more information on the capabilities of the manufacturing division of Compunetix, click [here](#).
