

## E-News

### **New Product Offerings for Meeting Transcription**

Compunetix is excited to announce the addition of real-time meeting transcription to our recently released [ConnectNow+](#) (CN+) meeting platform. This innovative feature enables attendees and hosts to view a live transcription of the meeting in a secondary window, providing a clear and accessible record of the discussion in real time. The transcription window contents, identified by speaker, can be saved and referenced after the session, enhancing the overall meeting experience and follow up actions.

The Compunetix Provider Transcription Portal (PTP) is a new batch processing application for collaboration service providers and CONTEX Summit Olympus and Conference Manager customers. The

Provider Transcription Portal is a utility and operations extension to the CONTEX Recording Manager workflow. PTP enables and empowers providers to quickly schedule and batch process audio files for transcription and translation, in a fast, smooth and efficient manner, from within the recording manager application. An added benefit is an easy and intuitive interface for selecting, uploading/ downloading and reviewing the received transcription/translations for delivery to the end customer.

### **Compunetix to Participate in MEDICA 2024 Show in Germany**

Compunetix, a leading global provider of advanced communication technology, is excited to announce its participation in [MEDICA 2024](#), the world's premier medical trade show. Held annually in Düsseldorf, Germany, MEDICA is the ultimate gathering for healthcare professionals, innovators, and industry leaders from around the world. With its extensive international presence, Compunetix is seizing this opportunity to expand its global reach in healthcare communications, connect with a broader audience, and showcase our cutting-edge solutions that are revolutionizing healthcare communication.

Compunetix is eager to engage with healthcare professionals, decision-makers, and technology experts at MEDICA 2024. We invite you to schedule an in-person meeting or a live demonstration of our solutions during the event. [Dino Mallas](#), International Sales Manager, will be at MEDICA to network and answer any questions you may have. This is an excellent opportunity to experience firsthand how our technology can enhance your healthcare operations, improve patient outcomes, and streamline communication within your organization.

### **Compunetix Cybersecurity Secondary Band Communications**

In an age where cyber-attacks are a constant threat, the necessity for robust and resilient communication systems has never been more critical. According to [Statista](#), the average cost of a single data breach is 9.48 million dollars in the United States. The recent two-day cyber-attack on [CDK Global](#), a leading provider of technology services to automotive dealerships, is a stark reminder of this vulnerability. The outage caused by the attack disrupted services of over 15,000 auto dealerships across North America, highlighting the crucial need for secure and reliable secondary band communications. The CDK outage likely slumped June auto sales and may have cost [more than \\$600M](#).

Secondary band communications, often referred to as backup or auxiliary communication channels, are essential for maintaining operational continuity during primary network failures. These systems ensure that critical information can still be transmitted and received, even when the main communication lines are compromised. This redundancy is vital for businesses that need to maintain constant and secure communication, especially during emergencies.

Compunetix has long been a pioneer in delivering cutting-edge communication and collaboration solutions that cater to diverse needs across various industries. Our comprehensive suite of tools is designed to enhance communication reliability, security, and efficiency. For secondary band communications, we offer a range of products that can seamlessly integrate with existing infrastructures, providing a [robust backup system](#) that activates when primary communication lines fail.

For more information on how Compunetix can enhance your organization's communication resilience, [contact](#) our team of experts today.
