FOR IMMEDIATE RELEASE

One Experience, One Voice and Video Conference, One Answer: Compunetix

Monroeville, Pa., June 17, 2014 – Compunetix, Inc., the leading provider of advanced collaboration solutions, announces the newest integration of the CONTEX Summit® voice and EVERGREEN™ video multipoint media processors at the upcoming InfoComm event in Las Vegas. The two market-leading platforms work together seamlessly behind the scenes, allowing users from room-based video terminals, PSTN phones, desktop video endpoints, or mobile phones to simultaneously join together in one call by simply entering the same passcode. Regardless of the endpoint, users are able to control the conference settings and perform actions including mute/unmute and volume adjustment. Compunetix will be demonstrating the integration at the upcoming InfoComm 2014 in Las Vegas, Nevada from June 18-20. The Compunetix Total Solution Portfolio of products and services will be highlighted at booth N2527; visit www.infocommshow.org to register.

Compunetix has become synonymous with delivering the highest quality and most reliable conferencing solutions to top tier providers around the globe. Continued integration of the EVERGREEN and Summit platforms, leveraging robust and open APIs, provides the necessary toolset to build and deliver unique, innovative, and high-value collaboration services combining audio, video and web media streams.

"The Summit/EVERGREEN integration is the ideal solution for the large capacity, service provider environment," notes Jim Klueber, Manager of the Video Systems Division. "Now scalability and reliability for voice, video, and web can be found with one partner – Compunetix."

"The end-user experience is seamless with this integration and represents the world's only true unified communications solution integrating large scale voice and video MCUs." states Gerard Pompa, Senior Vice President and Communications Systems Division Manager at Compunetix.

About Compunetix, Inc.

Compunetix is the leading manufacturer of multipoint collaboration equipment and Web collaboration software in the world. With over one million ports installed in more than 30 countries, the company has the industry's largest worldwide deployment of digital teleconferencing systems.
