Single interface with audio, video, and data sharing control

Seamless, Scalable, & Secure

New Product Offering to Revolutionize Team Collaboration & Communication

ConnectNow+ is a high definition, high capacity, voice, video, and web platform for enterprise and industry specific workflows. This secure and reliable solution, built for effective team collaboration, provides seamless access for administrators, users, and guests for day-to-day operations, executive meetings, all-hands calls, and much more. Offering real-time call management and encrypted recordings for future playback, CN+ is a powerful workflow-focused solution delivered into vertical segments such as healthcare, emergency management, remote hearings, transportation, financial organizations, and general business needs.

CN+ is specifically designed and tested with the user in mind. It features a highly intuitive interface with a sleek, contemporary, and easy-to-use flow. Brand-specific customization allows you to easily showcase your logo and theme, giving you complete control of the look and feel of the end user experience.

Next-Generation Team Collaboration

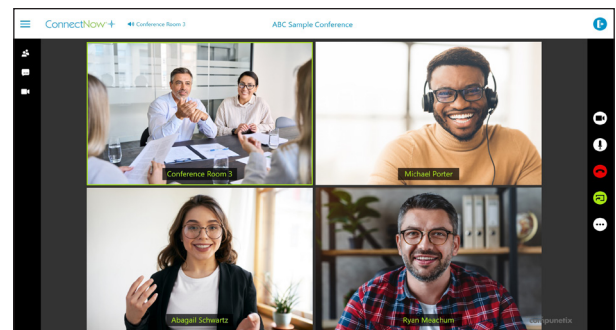

Key Features:

- **Share Feature:** Share files, desktop, images, and more
- **IP Audio:** Join using integrated HD audio (dial out/dial in also available for phone connections)
- **WebRTC Video:** Secure, encrypted, and configurable video connections with camera blur and video mute
- **Voice to Text Transcription:** V2T capability to generate fully auto-generated text using real-time closed capture and transcription
- **Participant List:** View and manage participants (mute, hold, disconnect, etc.)
- **Session Chat:** Communicate in real-time via private or group chat tool
- **Arrange Layout:** Pop-out feature enables chat, participant list, and video panel to be separated from main window and arranged freely
- **Host Portal:** Securely access session recordings and reports
- **Conference Lock:** Lock meeting to avoid unwanted entries
- **Self-Managed Q&A:** Provide a better way to share knowledge
