Dynamic Team Collaboration

A Next-Generation Communication Solution for the Evolving Workplace

ConnectNow is a compelling new productivity platform that empowers consistent and powerful team collaboration from any modern browser.

This robust platform offers integrated audio, web, and WebRTC video in a single solution, enabling seamless communication and collaboration. With one click you can share your ideas, data, desktop, and more.

The ConnectNow data sharing tool is designed and tested specifically with the user in mind. It features a highly intuitive interface with a sleek, contemporary, and easy-to-use flow. Brand-specific customization allows you to easily showcase your logo and theme, giving you complete control of the look and feel of the end user experience.

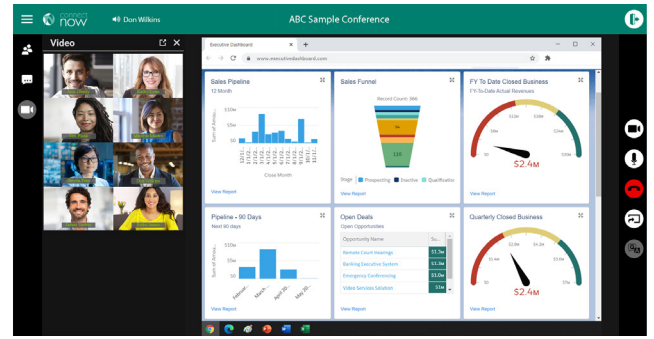

Next-Generation Team Collaboration

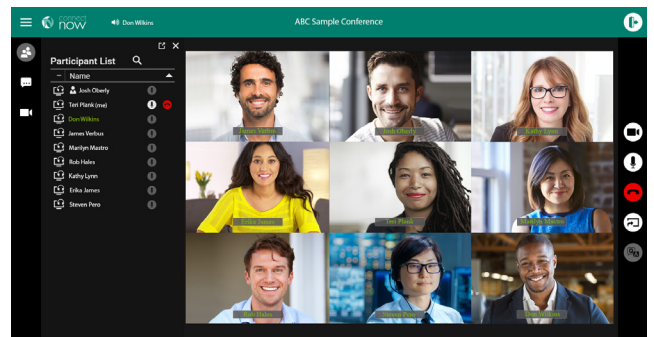

Key Features:

- **Share Feature:** Share files, desktop, images, and more
- **IP Audio:** Join using integrated HD audio (dial out/dial in also available for phone connections)
- **WebRTC Video:** Secure, browser-based video connection from any device
- **Active Talker:** Identify who's speaking and manage participant lines
- **Participant List:** View and manage participants (mute, hold, disconnect, etc.)
- **Session Chat:** Communicate in real-time via private or group chat tool
- **Arrange Layout:** Pop-out feature enables chat, participant list, and video panel to be separated from main window and arranged freely
- **Host Portal:** Securely access session recordings and reports
- **Roll Call:** Keep track of all participants and maintain meeting security
- **Conference Lock:** Lock meeting to avoid unwanted entries
- **Q&A Session:** Enables team participation with a question and answer period
